

YPB Workout Elliptical and Dumbbells 18

Upper Body

Date: ___/___/___

Directions for Elliptical: It is important to take your resistance up as far as it will go. Then back off the resistance until you feel like it is hard but still doable. You may need to lower your resistance level several times during the workout. This is okay. Mark the last resistance level you were on by the end. This should feel like you are hiking up a steep mountain or like you are walking in water. It should be tough but remember to go at your own pace.

1. Warm-up: (4 minutes on the Elliptical and 20 Pushups)

2. How long does it take you to complete 1 mile at your personal maximum resistance on the Elliptical?
